SUMMARY

Aspiring Cybersecurity Researcher and Developer passionate about building secure digital systems and immersive interactive experiences.

PROJECT

Personal AI Assistant – KIRA

- Raspberry Pi-based smart assistant inspired by JARVIS, integrated with voice commands and system monitoring.

Sky Realms SMP — Minecraft Server Project

- Built and managed a vanilla-style Bedrock SMP with custom systems, spawn protection, teleport NPCs, and ClearLag automation.

Portfolio Website

- Designed a responsive neon cyberpunk portfolio with interactive navigation, resume, projects, testimonials, and contact form.

Bedrock Essentials Pack

- Developed modular command-based system including /spawn, /rtp, /sethome, /tpa, and protection modules.

BetterClearLag System (v1.21.90+)

- Automated item-clearing system using scoreboard timers and real-time countdowns.

EDUCATION

Diploma in Cyber Forensic & Cyber Security

2025 – 2028

- Specialization in Cyber Forensics, Ethical Hacking, Network Security, and Digital Investigations.

SKILLS

Ethical Hacking, Penetration Testing, Network Security, Digital Forensics, Reverse Engineering

HTML, CSS, JavaScript, Node.js, React, Python, PHP, Command Blocks, Minecraft Script API, Linux (Kali, Void, Raspberry Pi)

English (Fluent)
